MILANO

FURNITURE LINE

‘Textiles that complement architecture’ is the best way to describe C&C MILANO’s approach to design. Our refined combination of different materials produces leading edge textiles for use in exterior and interior spaces.

The C&C Milano lifestyle design is well expressed within the bespoke range of home linens, rugs and curtains. Integral to this concept is an absolute attention to detail and the ability to offer fully customised items on residential and contract projects.

During the Salone del Mobile we will be showcasing creativity in design, fusing innovation with tradition. We are excited to showcase a new furniture line designed by PIERO CASTELLINI Baldissera, a collaboration echoing the clean, linear style as recognised in C&C MILANO. From textiles with highly technical aspects to those with treasured traditional qualities; the C&C MILANO showroom promises to be a key reference point for the world of architectural and interior design projects.
